Beakers

Heavy-Duty Beakers

- Specifically designed to offer the best mechanical strength under harsh conditions
- Reinforced rims, thicker walls and heavier bases provide beakers with increased strength and longer life
- Sizes 250ml and greater have a double graduated scale to indicate their approximate content
- All sizes have an extra large marking spot

Low-Form Beakers

- Beakers with spout
- Manufactured from Pyrex® orosillicate glass to ensure high resistance to chemical attack and thermal shock
- For convenience all beakers are graduated and have large durable marking spots
- Complies with ISO3819

Beakers

Polypropylene Beakers

- Straight-sided beakers in Azlon 'square' design
- Comply with **BS5404: Part1: 1976** Good chemical resistance
- Withstand temperature resistance up to 135°C
- Ideal for general laboratory use

Graduations and an indication of material and maximum heat resistance are clearly printed using indelible solvent resistant ink.

Solvent-Venting Wash Bottles

- High-quality washbottles feature a unique patent feature a unique patent (applied) for valve mechanism which automatically vents volatile
- Solvent vapour eliminating the common, irritating and potentially hazardous problem of solvent drip
- Easy-to-fill, wide neck Azlon design
- Custom/DIY versions features printed write-on areas which allows you to create your suitable solvent label
- Complete with adhesive orange and black hazard symbols

Chemical resistance information is available on request. If you have any doubt as to the suitability of a washbottle for use with a particular solvent, please contact our Technical Department.

Grant

- High-power, industrial, piezo-electric transducers quarantee efficient operation
- Robust and reliable performance
- All wetted parts made of high-quality stainless steel to prevent corrosion
- XB6, 14 and 22 models include lid and basket, integral timer, heater and drain facil-
- Designed to maximise the working area with a small footprint
- Complies with IEC1010-1 and IEC1010-2

Well-established ultrasonic technology, using industrial calibre transducers, gives effective and long-lasting cleaning performance. The tanks are enclosed within attractively styled and robust moulded plastic and powder-coated steel skirts. Tank sizes range from 2 to 22 litres, baths XB6, XB14 and XB22 are supplied with lid and cage

Bench pH Meter

- Large clear LCD displays pH/mV with °C
- Automatic calibration with choice of 5
- User-friendly operation with LCD icons Automatic or manual temperature compensation
- Supplied with glass bodied combination pH electrode, temperature probe

Advanced microprocessor bench pH meter for accurate measurement of pH, ion selective readings redox and temperature across a wide range of applications. Exceptionally user-friendly with graphic icons on the large LCD to guide the user through calibration, correct buffer choice,

stable readings and problem solving. Calibration is automatic with a choice of 5 buffers. Readings can be temperature compensated either automatically or manually from 0°C to 100°C. Supplied complete with glass combination pH electrode, temperature probe and starter pack including buffer solutions 4 and 7, electrolyte and cantilever electrode holder

Magnetic Stirrer

General-purpose laborato-

- ry stirrer
- Capacity 1 litre
- Precision seed control variable up to 1000rpm
- Compact size saves on bench space
- Built-in speed limiter for extra safety

Very popular low-cost and compact magnetic stirrer for laboratory and production use giving variable speed up to 1000rpm for samples of up to 1 litre. For safety, electronic controls are incorporated for precision speed control and to limit the maximum speed even if the load is suddenly removed. The ABS plastic top cover resists accidental chemical spills and is supplied with one 25mm long Teflon® coated stir bar.
