NEMA ENCLOSURES

NEMA, UL, IEC PLASTIC BOXES—NBA SERIES

Features:

- Gasketed enclosures meet NEMA 1, 2, 4, 4X, 12, 13 IEC 529, IP65 and UL-508-4X specifications
- May be used in wet, dirty, and corrosive environments
- ABS/PC blended plastic with UL94-5VB flammability rating
- Suggested service temperature range -40°C to +70°C
- Stainless steel hinges with locking draw latch
- Optional clear doors are polycarbonate with UL94V-0 rating
- Modifications available, call Newark
- Order accessories separately on pages 2128-2129

INDOOR VERSION WITH SOLID DOOR

NEMA, UL, IEC PLASTIC BOXES—NBB SERIES

Features:

- Gasketed enclosures meet NEMA 1, 2, 4, 4X, 12, 13 IEC 529-IP66
- May be used in wet, dirty, and corrosive environments
- Non-metallic hinges with snap-action latches
- Stainless steel wall mounting brackets
- Finish, light gray body and door
- Indoor versions are ABS/PC blended plastic with UL94-5VB flammability rating
- Outdoor versions are PC/PBT blended plastic with UL94-5VA flammability rating and UV stabilized
- Optional clear doors are polycarbonate plastic with UL94V-0 flammability rating and UV stabilized
- Modifications available, call Newark
- Order accessories separately on pages 2128-2129

NF SERIES FIBERGLASS NEMA ENCLOSURES

Features

- Meets NEMA 1, 2, 4, 4X, 12, and 13 ratings
- Meets IP66 ratings
- Meets UL508-4X requirements
- Light gray finish

Just Added

The NF series NEMA enclosures are constructed of a durable and easy to machine fiberglass reinforced plastic (SMC). They are suitable for outdoor and indoor applications. Hinge, screws and wall mounting brackets are made of stainless steel. Powder coated internal steel panel is also included.

NEMA SHEET METAL BOX WITH MOUNTING BRACKET

Just Added

- Durable 14 gauge steel
- Smooth continuous welded seams
- External mounting brackets
- Hinged cover clamps to base to allow watertight seal
- Stainless steel screws and brackets included
- Weld nut for inner panel mounting
- Bonding studs for grounding on base and door
- Designed to meet NEMA 1, 2, 4, 4X, 12, 13 and IP65 and UL508-4X ratings
- Modifications available, contact Newark

SNB SERIES STEEL NEMA ENCLOSURES

Features

- Meets NEMA 1, 2, 4, 4X, 12, and 13 ratings
- Meets IP65 rating and UL508-4X requirements
- Key lock cover provided
- Bonding studs for grounding provided on base and door
- Smooth gray powder finish

Just Added

These SNB series NEMA sheet metal boxes are constructed of a continuous seam welded 16 gauge steel. Their unique stainless steel hinges allow for easy disassembly of cover. Wall mounting holes are located on the inside for security. A Zinc plated 14 gauge steel removable inner panel is also included.

DIE-CAST ALUMINUM NEMA 1, 2, 4, 4X, 12, 13 BOXES

- Gasket Installed
- PC Board Mounting Bosses
- Wall Mount Holes
- Tested and Passed UL 508-4 Requirements

Resist atmospheric and marine corrosion. Wall mount and cover attaching screws are outside the sealed area to further allow integrity of the seal. Internal bosses for mounting PC boards horizontally or for connecting terminals. Internal guide slots for mounting PC board assemblies vertically. Include M4 stainless steel nonmagnetic screws, copper-plated ground screw and washer. Meets NEMA enclosure type 1, 2, 4, 4X, 12, 13 and IEC enclosure IP65 classification. Natural or Gray finish. For non-NEMA die-cast boxes look on page 2132. Modifications available; go online or call Newark.

*Wall Mount
(6947)

NEMA 1, 2, 4, 4X, 12, 13 DIE-CAST ALUMINUM BOXES WITH MOUNTING BRACKETS

- ADC-10 aluminum alloy construction
- Excellent screening properties
- Gasket covers attach with M4 stainless steel screws
- Internal bosses for mounting PCBs horizontally
- Mounts to wall or panel
- Heavy-duty 0.09" thick external wall mounting bracket
- Tested and listed to UL-508 Type 4X requirements
- Meets NEMA 1, 2, 4, 4X, 12, 13 requirements

Feature EPDM gaskets installed in natural aluminum finish boxes; included but not installed in black finish boxes. Most models also allow for vertical PCB mounting. Easy to mount, allows for mounting box without having to remove cover; mounts at base to allow access to internal components without unmounting box. Color: natural aluminum finish or smooth black powdercoat finish. Modifications available, [contact Newark](#).

DIE-CAST ALUMINUM NEMA BOXES—CN SERIES

CN-SERIES NEMA BOX

WITH MOLDED-IN MOUNTING FLANGES

- Rugged #ADC-12 alloy die cast aluminum box with NEMA 1, 2, 4, 4X, 12, 13 and IP65 ratings
- Self-adhesive gasket easily attaches to cover
- Cover attaches with 4 or 6 screws for a secure and tight seal
- Many sizes have internal card guides for PC Board mounting or partitioning

Available in natural finish, other finishes available. Easily machined and modified for customization, [go online or call](#).

MOLDED-IN MOUNTING FLANGES

Mounting flanges are molded-in, onto the short side of the base for one-piece construction, eliminating separate welded-on plates that could trap fluids. Allows wall or panel mounting without having to remove the cover and expose internal components to the environment.

NEMA 1, 2, 4, 4X, 12, 13 DIE-CAST ALUMINUM BOX WITH HINGED COVER

- Hinged cover
- External mounting brackets
- NEMA 1, 2, 4, 4X, 12, 13 and IP65
- Available in smooth black powder coat finish
- Offers EMC protection

Hinged cover allows for easy access without risk of damage to cover. External mounting brackets allow the box to be mounted on a wall or panel without having to remove the cover and exposing internal components to the environment. Gasketed cover attaches with screws. Easily machined and modified to your particular requirements. Modifications available; [go online or call Newark](#).

NEMA ENCLOSURES

PN SERIES NON-METALLIC NEMA 1, 2, 4, 4X, 12, 13 BOXES

- Ideal for PCB Enclosures, Junction Boxes and Most Electrical and Electronic Applications
- PN Series Boxes Feature a Smooth, Flush Top Cover
- PNR Series Boxes Feature a Recessed Area in the Top Cover for Labels, Nameplates, Keypads, Etc.
- Style 1: Light Gray Polycarbonate Body and Cover, UL Stabilized UL94V2 Flammability Rating, Suggested Service Temperature: -40°C to +120°C
- Style 2: Same as Style 1 Except Covers are Made of Clear Polycarbonate
- Style 3: Dark Gray ABS Body and Cover, UL94-HB Flammability Rating, Suggested Service Temperature: -40°C to +80°C
- All are Designed to IP 65 of IEC 529 and NEMA 1, 2, 4, 4X, 12, 13 Specifications
- All Have Wall Mounting Holes
- Cable Glands Available on page 2132
- Modifications available; go online or call Newark

NEMA ENCLOSURES • METAL ENCLOSURES

BT SERIES POLYCARBONATE NEMA ENCLOSURES

Just Added

Features

- Meets NEMA 1, 2, 4, 4X, 12, and 13 specifications
- Meets IEC52/IP65 and UL508-4X specifications
- UL94-V2 flammability rating
- Suitable for wet, dry, and/or corrosive environments
- Covers sealed with silicon gasket
- Transparent blue finish

The **BT series** UV stabilized Polycarbonate enclosures are ideal for PCB enclosures, junction boxes, and other applications that require monitoring of internal components without the need for removing the cover. Wall mounting holes and cover attaching screws are outside the sealing area, thus preventing ingress of moisture and dust.

CABLE GLANDS

Assembly consists of black molded nylon body, hex nut, cable nut and a rubber gasket and cable seal. Cable seal maintains NEMA rating for cable entry or exit. Nylon material has UL94V-2 flammability rating and -40°C to +100°C suggested service temperature. Use cable glands with any Bud NEMA boxes.

UL/NEMA 12 CABINET RACKS AND ACCESSORIES

- Adhere to NEMA 12 and IEC 529 IP55 Requirements
- Oil Resistant Gaskets
- Comes Complete With Frame, Locking Front and Rear Doors, Externally Removable Side Panels, and Four Adjustable 19.23" Panel Width Panel Mounting Rails
- Sturdy All-Welded Heavy Steel Construction
- Gasketed 9.5" Cable Access Ports in the Top and Bottom
- Doors Equipped with 4-Point Latches for Positive Sealing
- Finish: Gray Texture
- Tested and Listed Under UL508 Type 12
- Modifications available, *contact Newark*

UL/NEMA 12 CABINET RACK ACCESSORIES

These accessories are ideal for fixing, replacing or enhancing the UL/NEMA 12 cabinet racks. Base Post Kit raises cabinet rack 2.26" off the floor to allow for on-the-floor cabling. Base Panel Kit attaches to base post to form a solid surface. Plexiglas doors can be used to replace the solid door and allow internal equipment to be monitored. Internal rear panel attaches to cabinet horizontal rails to allow the mounting of surface mount equipment. Add-A-Rack kit allows two or more cabinets to be bayed together. Casters mount either directly to the bottom of the cabinet or to the base posts.

DIE-CAST ALUMINUM ECONOBXES

Economical, lightweight, easy-to-machine enclosures are ideal as instrument and meter cases, filter networks, junction boxes, switches, and audio and radio frequency distributors. Die-cast ADC-10 aluminum alloy construction offers excellent screening properties. Perfect for applications requiring a sturdier structure than sheet metal utility cabinets. Close-fitting flanged lids fasten to body with screws. Look for NEMA rated die cast boxes on pages 2129-2130. Modifications available, *go online or call.*

METAL ENCLOSURES

ECONOBOXES™ WITH MOUNTING BRACKET

- ADC-10 aluminum alloy construction
- Excellent screening properties
- Close-fitting covers attach with #6-32 self-tapping screws
- Mounts to wall or panel
- Heavy-duty 0.09" thick external wall mounting bracket

Econoboxes™ are easily machined or modified to any application requirement. Mounts to wall or panel with #10 size screws (not included). Mounts at base to allow access to internal components without unmounting box. NEMA rated boxes available, on pages 2129-2130. Color: natural aluminum finish or smooth black powdercoat finish. Modifications available, *contact Newark*.

METAL ENCLOSURES • NON-METALLIC ENCLOSURES

ALUMINUM AND STEEL UTILITY CABINETS

AU Series is designed with:

- Sturdy, all-riveted 0.040" aluminum construction
- Removable front and back panels for easy accessibility
- Available in natural aluminum or metallic gray (MG) finish.
- Ideal for mounting amplifiers, meters and test instruments
- Modifications available, *contact Newark*

CU Series is designed with:

- Constructed of 20-gauge steel with metallic-gray finish
- Sturdy, all-riveted body with removable front and back panels
- Ideal for electronic equipment, monitors and frequency meters
- Modifications available, *contact Newark*

POLYSTYRENE MOLDED ENCLOSURES

High-Impact ABS

Molded plastic enclosures meet IEC 529 enclosure IP54 classification for instrumentation, telecommunications, and other applications from hand-held to desktop sizes. 2-part design with tongue-and-groove joint between top and bottom covers and end panels. Internal guide slots for vertical mounting of PC boards; internal bosses for horizontal PC board mounting. Scratch-resistant, lightly textured top and bottom covers. Four M-3 screws are countersunk in bottom cover, threaded into brass inserts in top cover. UL 94V-0 ABS top and bottom covers are dark gray with light gray end panels. High-impact ABS top and bottom covers are light gray with dark gray end panels. Modifications available, *contact Newark*.

NON-METALLIC ENCLOSURES

GRABBERS HAND-HELD PLASTIC BOXES

Grabber enclosures are ideal for portable hand-held equipment. Made of durable ABS plastic, they are available in 5 styles and have a flammability rating of UL94V-0. **Style A** is a rectangular enclosure featuring a recessed top and a 9V/AA battery compartment. It comes in light gray finish and is available with or without a 2.84" x 1.38" LCD cutout in the display area. **Style B** is a T-shaped enclosure featuring a recessed top and a light gray finish. It is available with or without a 4.00" x 1.75" LCD cutout in the display area and with or without a 9V/AA battery compartment. **Style C** is a smaller, more ergonomically shaped rectangular enclosure that is available in a light gray or black (*) finish. It includes a recessed top, 9V/AA battery compartment and removable end panel. **Style D** is a small, easy-to-handle box that comes in a black finish and is available with a flush (†) or recessed top. **Style E** is a pocket-size enclosure that comes in a black finish with a molded-in key ring which increases height to 2.55". Modifications available, *contact Newark*.

UTILIBOX™ STYLE B

Features:

- Impact resistant ABS plastic, with UL94-HB flammability rating
- Card guides accept 0.062" thick cards and are spaced at .53" centers for flexibility of component placement
- Cover panel is 0.050" Aluminum
- Black body finish with anodized aluminum cover panel
- Modifications available, call Newark

Utilibox™ series is the ultimate value in plastic utility boxes.

UTILIBOX™ STYLE J

Features:

- ABS plastic with UL94-HB flammability rating
- Suggested service temperature -40°C to +80°C
- Internal PCB card guides accept both horizontal and vertical boards
- Grid pattern on underside of cover for modification reference points
- Standard finish, black
- Modifications available, call Newark.

Utilibox™ series is the ultimate value in plastic utility boxes.

UTILIBOX™ STYLE J

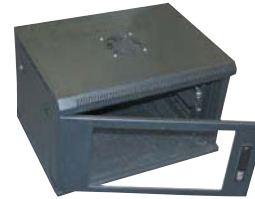

VISIONCAB STEEL CABINETS

Features

- Internal cabinet depth: 21.77"
- 110 VAC, 105 CFM exhaust fan supplied
- Removable front door with clear Acrylic window
- Solid steel removable rear door
- Quickly removable sides
- Smooth black powder finish

Just Added

The VC series are highly styled and versatile steel cabinets suitable for housing a variety of 19" panel width and EIA 310 compatible equipment. Four adjustable L-shaped mounting rails with square holes on EIA spacing and four L-shaped support angles are supplied. Rails will accept either #12-24 (Bud #307) or M6 (Bud #851-DLH) cage nuts. Four mar resistant rubber feet are included as well.

WALL MOUNT CABINETS

3-Section Style

- Plexiglas™-Paneled or Steel Key-Lockable Front Doors

Wall mount cabinets available in 2- and 3-section styles with Plexiglas™ or steel door. Both cabinet styles feature standard 19" EIA panel mounting rails in rear section with 1.1" and 3" diameter knockouts in both the top and bottom of the rear section for easy cabling access. 4.5" deep rear section, 2" deep door section, and 20.50" length overall. Sturdy 16-gauge steel construction finished with durable black textured powdercoat paint make cabinets suitable for telecom, datacom and other electronic equipment needs. Removable hinges allow for both left-hand and right-hand applications. 3-section styles have a swing frame center section, with adjustable 19" EIA panel mounting rails and exhaust fan mounting option. Both cabinet styles also available in off-white textured finish; *go online or call.* Modifications available, *contact Newark*.

CABINETS & RACKS

VALURACK UPRIGHT CABINET RACK

- Ready-to-use capability
- Welded together strength and sturdiness
- Accepts all standard accessories
- EIA-310 Compliant
- Durable black texture powdercoated finish

VR series feature integral, full height, front panel mounting rails with EIA universal spaced mounting holes. Panel mounting rails are located in the front of the cabinet and are recessed 1.00". Welded-in supports allow for mounting additional adjustable panel mounting rails. Large 10.00" square hole in the bottom of the cabinet, along with 1.11" diameter knockouts provides cable access. Bottom of cabinet is pierced for use with casters or levelers. Top is perforated for use with 10.00" exhaust fan. Suggested 700# equipment load capacity and higher when used in conjunction with adjustable panel mounting rails for 4-point equipment mounting. A sampling of suggested cabinet rack accessories are available on page 2145. For full line of accessories, on pages 1456 and 2147, and 2149-2151. Modifications available, go online or call Newark.

SERVER CABINET SYSTEMS

- Extra Deep 36" and 43" Cabinets Accept Most Manufacturer's Servers; Panel Space: 78.75 x 19"
- Front Econoglass Door is Ventilated; Sides, Top and Rear Door are Perforated for Maximum Air Flow
- Cable Access Ports in Both Top and Bottom Panels
- 2 Pairs of Fully-Adjustable Universal Spacing Mounting Rails
- Welded Frame
- Add-A-Rack System Permits Building a Series of Racks into 1 Integral System

Cabinets are finished in textured black powder coat. Each Add-A-Rack unit is identical to the main cabinet but allows the economical combination of 2 or more cabinets. Order one main cabinet; successive bays may be ordered as Add-A-Rack versions. Modifications available, contact Newark.

CABINETS & RACKS

ALUMINUM OPEN RELAY RACKS

Ideal for installation where easy access to components is a top priority. Built for solid, trouble-free service, these aluminum racks are available in two heights: 42" and 77" with 19" and 23" wide panel spaces. Panel mounting holes are #12-24 tapped on E.I.A. universal spacing, on both front and rear flanges. Racks have been tested to 1000-lb. equipment load capacity. Order shelves separately on page 2147. Modifications available, contact Newark.

TEM-STAT TEMPERATURE
CONTROLS

Tem-Stat controls react to gradual or sudden temperature changes in cabinets. When temperature reaches designated setting, contacts open or close (depending upon type) and remain open (or closed) until there is a 10°(±5°) decrease. UL listed, CSA certified.

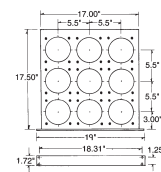

Mfg. Part No.	Contacts Type	Stock No.	Price Each
			1-5
● TS-15	Normally Open — Closed on Temperature Rise	16M3847	41.59
● TS-22	Normally Closed — Open on Temperature Rise	06M4878	41.59

FAN TRAY ASSEMBLIES

FN-1280

- Easy Installation
- Fits 1U (1.75") Panel Height
- Choice of Fan Location

Mfg. part no. FT-1170 fan tray assembly includes 9-position fan tray with preassembled front panel, a 9-outlet daisy chain cord, a 6" power cord, adjustable support angles, and 9 knock-outs. Fan tray and support angles are constructed of 16-gauge steel. Front panel is 12-gauge steel. The fan tray and front panel available in your choice of white textured (suffix WH) or metallic-gray (suffix MG) finish. Order fans for tray and finger guards separately below.

Mfg. Part No.	Description	Stock No.	Price Each
			1-4
● FT-1170-WH	White Textured Finish	06M4714	186.05
● FT-1170-MG	Metallic Gray Finish	06M4713	200.18

Mfg. part no. FN-1280 fans can be mounted in any pattern to suit individual cooling requirements. May be installed to blow up or down. Include one hardware cloth finger guard and mounting hardware. 110V, 0.21A. Airflow: 105 cfm. Operating temperature: -20°C to +60°C. UL recognized.

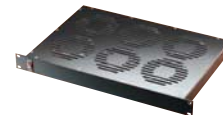

Mfg. Part No.	Stock No.	Price Each
		1-4
● FN-1280	05M4114	31.88

Mfg. part no. FG-1281 wireform finger guard is used for applications requiring finger guards on both sides of fan. Increases overall height of fan tray assembly to approximately 1.875".

Mfg. Part No.	Stock No.	Price Each
		1-14
● FG-1281	06M4712	9.69

AC FAN TRAYS

- Standard EIA 19" panel width and 1U (1.75") height
- Illuminated on/off switch conveniently located on front panel
- 115VAC, 60Hz operation
- Black texture finish
- 7-ft. long power cord
- Shipped completely assembled
- Additional support brackets included with 6- and 9-fan versions

Mfg. Part No.	No. of Fans	cfm	Overall Size	Stock No.	Price Each
			H x W x D (in.)		
FT-1973	3	315	1.75 x 19 x 7.00	97H5048	168.13
FT-1976	6	630	1.75 x 19 x 12.00	97H5049	258.69
FT-1979	9	945	1.75 x 19 x 17.25	97H5050	339.27

NEMA ENCLOSURES

SMALL NEMA ENCLOSURES (HINGED COVER)

**Hinged Cover - Clamped (NEMA 12 & 13):**

- Rugged enclosures feature external screw clamps on 3 sides and continuous hinged cover
 - Includes inner panel (except where noted); white powder paint
 - Protection against dirt and dust
 - Watertight, oil- and petroleum-resistant protection
 - Piano-hinged cover
 - NEMA 12 models finished in ASA 61 gray recoatable powder paint
 - UL Listed, CSA Certified
- Suitable for transformer or instrument housings. Use as electrical junction and terminal boxes, to mount pneumatic or hydraulic instruments, or as control tubing junction point.

**Hinged Cover - Clamped (NEMA 4, 12 & 13):**

- Rugged enclosures feature external screw clamps on 3 sides and continuous hinged cover
 - Includes inner panel (except where noted); white powder paint
 - Protection against dirt and dust
 - Watertight, oil- and petroleum-resistant protection
 - Piano-hinged cover
 - Finished in ASA 61 recoatable powder paint
 - UL Listed, CSA Certified
- Suitable for transformer or instrument housings. Use as electrical junction and terminal boxes, to mount pneumatic or hydraulic instruments, or as control tubing junction point.

**Hinged Cover - Quarter Turn Latch (NEMA 4, 12 & 13):**

- 16-gauge steel body and door
- Unpainted, galvanized steel inner panel included
- Continuously welded seams, formed lip on door and enclosure to exclude flowing liquids
- Continuously hinged door has 304 stainless steel hinges and provides 180° opening
- Bonding stud on door and ground stud in enclosure
- Permanently secured oil-resistant gasket with retainers
- Door features quarter turn latch formed from black zinc diecast
- Finished in recoatable ANSI/ASA61 gray powder paint
- UL508 Type 3R, 4, 12 and 13
- CSA Type 3R, 4, 12 and 13

SMALL STAINLESS STEEL NEMA ENCLOSURES (HINGED COVER)

**Hinged Cover - Clamped:**

- Rugged enclosures feature external screw clamps on 3 sides and continuous hinged cover
- Includes inner panel (except where noted); white powder paint
- Protection against dirt and dust
- Watertight, oil- and petroleum-resistant protection
- Piano-hinged cover
- UL Listed, CSA Certified

Suitable for transformer or instrument housings. Use as electrical junction and terminal boxes, to mount pneumatic or hydraulic instruments, or as control tubing junction point.

**Hinged Cover - Quarter Turn Latch:**

- 304 Stainless steel body and door
- Unpainted galvanized steel inner panel included
- Continuously welded seams, formed lip on door and enclosure to exclude flowing liquids
- Continuously hinged door has 304 stainless steel hinges and provides 180° opening
- Bonding stud on door and ground stud in enclosure
- Permanently secured oil-resistant gasket with retainers
- Door features quarter turn latches formed from 316 stainless steel
- UL508 Type 3R, 4, 4X and 12
- CSA Type 3R, 4, 4X and 12

SMALL NEMA 12 LIFT-OFF AND SCREW COVER ENCLOSURES

Lift-Off Cover Features:

- Rugged enclosures feature external screw clamps and lift-off cover
- Inner panel (except where noted) and plated lid chain
- Smooth, continuously welded seams
- Enclosure grounding stud
- Welded wall mount brackets
- Permanently secured oil-resistant gasket
- Formed from 14-gauge or 16-gauge steel
- Enclosures finished in recoatable ASA 61 gray powder paint and panels finished in white powder paint
- UL 508 Type 12 and 13, CSA Type 12 and 13

Lift-Off Cover

Screw Cover Features:

- Rugged enclosures feature captive screw cover
- Smooth, continuously welded seams
- Enclosure grounding stud
- Welded wall mount brackets
- Permanently secured oil-resistant gasket
- Inner panel (except where noted)
- Formed from 14-gauge or 16-gauge steel
- Enclosures finished in recoatable ASA 61 gray powder paint and panels finished in white powder paint
- UL 508 Type 12 and 13, CSA Type 12 and 13

NEMA 12 OIL- AND DUSTTIGHT PUSHBUTTON ENCLOSURES

Enclosure holes accept most standard heavy-duty oiltight 30mm Ø pushbuttons, switches, and pilot lights. Rugged enclosure is all-seam welded, 14 or 16-gauge steel. Box features wall-mounting flanges, ground stud, and thread seal wells for attaching cover screws. Finished in ASA 61 gray powder coating. Built to meet NEMA enclosure type 12. UL recognized, CSA certified.

PD SERIES ROLEC® MODULAR FIBERGLASS ENCLOSURES

- Designed for Use as Instrument Enclosures, Electrical Junction Boxes or Terminal Wiring Enclosures
- Provide Outstanding Protection Against Dust, Oil and Pressurized Water
- Impervious to Atmospheric and Marine Corrosion
- Meets NEMA Enclosure Types 1, 2, 3, 3R, 4, 4X, 5, 12, and 13
- Meets IEC 529 Enclosure IP66 Classification
- UL94V-0 Flammability Rating
- 2-Piece Molded Fiberglass Reinforced Polyester Construction
- Captive Polyfiber Cover Screws Are Provided with a Standard Slot Head
- Threaded Cover Screw Holes Also Provide Single-Channel Access to Rear-Mounting Positions
- Recessed Neoprene Gasket with Tongue-and-Groove Construction Is Oil and Petroleum Resistant
- Threaded Stainless Steel Inserts Provide for Internal Mounting
- Light Beige RAL 7032, Pantone® 413

FLANGED LID-DIE-CAST ALUMINUM ENCLOSURES

Mfg. part no. 1590 flanged lid die-cast enclosures allow for easy mounting to walls or shelves. These enclosures share the same body and features as the regular mfg. part no. 1590 enclosures except the lid is extended and four countersunk holes are cast into the flanges. The flanged lid also allows for added security as the lid/enclosure screws are hidden against the wall or shelf.

WATERTIGHT DIECAST ALUMINUM ENCLOSURES

Mfg. part no. 1590Z watertight aluminum diecast enclosures are designed to meet IP65 (dust and hose proof). These enclosures are perfect for housing sensitive electrical, pneumatic, hydraulic and electronic assemblies. They feature natural finish, a recessed silicon rubber gasket and captive, recessed stainless steel lid screws. Wall mountable using "through-box-blind hole" construction outside of gasket protection. North America Mark of Safety - cUL and UL listed. Certified to NEMA 4X standards (UL508)-file# E65324.

ALUMINUM DESKTOP CONSOLES

Mfg. part no. 1456 aluminum consoles are sold as complete units (top & bottom). The bottom section is fabricated from 0.081" thick aluminum and painted an off-white powder paint. The top sloped panel is 0.064" thick up to 14" wide models (0.081" thick over 14" wide) and is painted with a textured blue powder paint. Units include hardware and 4 self adhesive rubber feet.

LOW-PROFILE METAL INSTRUMENT CASES

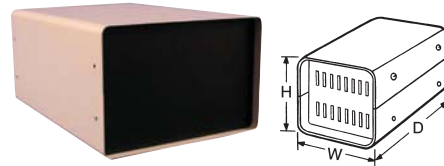

Case is split into two equal halves, constructed of 18-gauge steel with choice of satin black or gulf-blue finish. Front and back panels are 0.064" thick aluminum (one satin black, the other satin off-white) for easy machining. Symmetrical design; either end can be front or rear. Each unit comes complete with hardware and rubber feet.

ALUMINUM PC BOARD INSTRUMENT CASES

- Top and Bottom Halves Fabricated from Heavy 12-Gauge Aluminum
- Off-White powder paint finish
- Front and Rear Panels Are Easy-to-Machine Natural Aluminum (Paper-Coated on One Side)
- Hardware and 4 Self-Adhesive Rubber Feet Included

Mfg. part no. 1402 instrument enclosures are perfect for horizontal PC card mounting by sliding boards into side aluminum extrusions.

METAL ENCLOSURES

EXTRUDED ALUMINUM CASES

- Designed for Horizontal Mounting of PC Boards
- Panels Are One Piece with Integral Bezel
- PC Boards Slide Horizontally into Internal Guides Extruded into Walls
- Includes All Hardware and Rubber Feet
- Clear or Black Anodized Finish

Version 1 Contains:

- 2 Aluminum End Panels and 2 Plastic Bezels, Optionally Installed to Create a Modern Look

Version 2 Contains:

- 2 Easy to Machine, Solid Plastic End Panels

NON-METALLIC ENCLOSURES

1554 SERIES WATERTIGHT ABS PLASTIC AND POLYCARBONATE NEMA ENCLOSURES

- Suited for mounting PC boards or DIN rail mounted components
- Designed to meet IP 66 and NEMA 4, 4X, 12 and 13 ratings
- Molded-in internal DIN rail mounting tabs (except **1554C series**)
- Molded-in vertical PC card guides (except **1554B series**)
- Popular light gray (RAL 7035) color

1554 series watertight NEMA enclosures feature gasketed lid with two-piece "tongue and groove" construction to provide protection against access of oil, dust and water. Gasket is factory-poured using a high-temperature, UL listed silicon material. Lid is secured with self-captivating M4 stainless steel machine screws (included), threaded into integral stainless steel bushings. Internal threaded (M3) integral brass inserts and standoffs (designed for M3.5 or #6 self-tapping screws) for PC board or inner panel mounting in all versions except **mfg. part no. 1554B** sizes. **Mfg. part no. 1554xGY** general-purpose ABS plastic enclosures carry a UL94HB flammability rating and not recommended for outdoor use. Polycarbonate enclosures carry a UL94V5 flammability rating and are recommended for outdoor use. **Mfg. part no. 1554x2GYCL** polycarbonate enclosures feature a clear lid that allows for maximum visibility of protected internal components.

MULTIPURPOSE FLAME RETARDANT ABS PLASTIC STANDARD AND FLANGED LID ENCLOSURES

Flanged Lid

Standard Lid

- Ideally suited for mounting printed circuit boards horizontally
- Flanged lid is perfect for wall or shelf mounting and enclosure security
- Internal sides of enclosure are smooth for easy connector installation
- Tongue and groove lid to box construction provides protection against environmental elements
- Designed to meet IP54
- Lid and box both contain - four molded in PC board standoffs
- Molded from easy to machine, flame retardant ABS plastic
- ABS plastic material carries a UL flammability rating of 94V-0

Lid is secured with M3 x 10 mm Phillips machine screws, threaded into integral brass bushings. Perfect for applications with repetitive assembly and disassembly are required. Stocked in satin texture black and grey. Black enclosures include black screws, all others - standard nickel finish screws.

SOFT-SIDED HAND HELD
ENCLOSURES

- Ergonomically designed for hand-held comfort
- Choice of two versions, with or without battery door and compartment and two sizes
- Over molded in general purpose ABS plastic with a soft gray plastic grip
- Top cover is recessed for membrane display or keypad
- PC board standoff's are molded into case
- Includes removable front panel, for easy modifications, and assembly hardware
- Battery door and compartment version includes 4 battery clips (for 2-AA batteries) and a 9V (PP3) battery clip
- Choice of two enclosure colors, light gray (RAL7035) or black (RAL9011), the soft side plastic material is gray (RAL7012)

HIGH-IMPACT (FRABS) PLASTIC
HAND-HELD CASES

Molded in flame-retardant, high-impact ABS (FRABS) plastic, meets UL94V-0. Includes integral brass inserts and machine screws (M3 head) providing extra strength for repeated assembly and disassembly. Recessed top panel is ideal for membrane display; lap joint construction provides protection against dust and liquid. Extra-deep top and ultra-shallow base designed to enhance aesthetics and improve flexibility as a "hand-held" instrument. Twelve PCB bosses (six in both top and bottom) and vertical mounting slots (used with optional battery compartment dividers) are molded in. Order battery dividers and belt clips separately; go online or call.

NON-METALLIC ENCLOSURES

1599 SERIES BATTERY ENCLOSURES

Molded from flame retardant ABS plastic; meets UL 94V-0. Styled for use as a hand-held instrument enclosure. 2-piece, lap joint construction provides protection against dust accumulation and splashing water. Recessed top panel for membrane display or pad. 2 keyhole knockouts facilitate wall mounting. Includes 4 machine screws. Meet IEC enclosure IP54 classification. *Order enclosure battery holder kits separately; go online or call.*

1599RFI SERIES HAND HELD CONDUCTIVE PLASTIC ENCLOSURES

- Designed for EMI/RFI shielding applications
- UL 94V-0 flammability rating
- Ergonomically designed for use as a hand-held instrument enclosure
- Recessed top for membrane display or pad
- Designed to meet IP54

1599RFI series is molded from a compound of stainless steel fibers and flame retardant ABS plastic. The lap joint construction provides protection against dust accumulation and splashing water. Lid is secured with Phillips machine screws threaded into tapped integral brass bushings. Ideal for applications where repetitive assembly and disassembly are required. Two keyhole knockouts are molded into the inside of the base to facilitate wall mounting installation. Black with matte textured finish.

HEAVY-DUTY (FRABS) PLASTIC BOXES

These Rugged Boxes Feature:

- Matte textured, thermoplastic/flame retardant high-impact ABS (FRABS) for easy punching and drilling
- UL94V-0 Flammability rating at 1.77mm with 60°C continuous temperature
- countersunk lid
- Threaded brass inserts with M3 x 0.5 x 18mm Phillips machine screws
- Average wall thickness: 0.124"
- Ideal for frequent opening/closing

Removable PC card guides and watertight versions also available; *go online or call.*

1594RFI SERIES HEAVY DUTY CONDUCTIVE PLASTIC ENCLOSURES

- Designed for EMI/RFI shielding applications
- UL 94V-0 flammability rating
- Rugged electronic instrument enclosures
- Heavy duty thick wall design, .13" (3.3mm) thickness
- Designed to meet IP54

1594RFI series is molded from a compound of stainless steel fibers and flame retardant ABS plastic, the thick wall design is suited for mounting printed circuit boards. Countersunk lid is secured with four M3 x 0.5-0.71" (18mm) long, Phillips machine screws threaded into integral brass bushings. Ideal for applications where repetitive assembly and disassembly are required. Black with matte textured finish.

NON-METALLIC ENCLOSURES • CABINETS & RACKS

DISPLAY MODULE T PLASTIC HAND-HELD CASE AND ACCESSORIES

Molded in flame-retardant ABS (FRABS) thermoplastic (easy to drill and punch), UL 94V-0 rating. 2-piece tongue-and-groove construction provides protection against dust and liquids designed to meet IEC enclosure IP54 classification. With optional gasket and sealing feet, the unit is designed to meet IEC enclosure IP65 classification. Units are assembled using machine kit screws into threaded brass inserts. Ideal for repetitive assembly and disassembly. Mounting bosses are molded in for display and PC board mounting. "S" in mfg. part no. indicates solid display area, 4.8 x 4" (122 x 87); "C" in mfg. part no. indicates an open display area with a clear polycarbonate lens, 4.0 x 1.77" or (102 x 45) with a plain Mylar mask kit. The keypad area is recessed, ideal for membrane panels 3.4 x 4.68" (87 x 119) on both versions. Units are 1.35" thick, including lid.

CABINETS & RACKS

LIGHT DUTY
KNOCKDOWN STEEL
RACKS

Just Added

Features

- Fabricated in 12-gauge steel
- Rugged textured black powder paint finish
- Base punched to accept 4 casters
- Front flange drilled and tapped (10-32) with universal EIA (5/8-5/8-1/2 in.) spacing
- Weight load tested (DNRR1984LDK) to 800 lbs

The **DNRR series** open frame relay racks are suitable for use as a single, free standing unit for sturdy support of standard 19" rack mount devices. These knockdown racks are shipped in a flat pack container for easy handling and shipping protection.

ADJUSTABLE
DEPTH BRACKETS

Just Added

Features

- Adjustable depth from 12" to 18"
- Full EIA hole centers (5/8-5/8-1/2 inch spacing) drilled and tapped for 10-32 hardware
- Multiple cable lacing tie-offs punched into unit
- Weight load tested (**APB19007**) to 70 lbs
- Rugged textured black powder paint finish

The **APB series** adjustable depth brackets are constructed of 16 gauge formed steel. They are suitable for 19" rack mount equipment. Brackets are double-hinged on one side to access rear of equipment. Smooth 8" x 2.5" hole on the rear for wire access. Rear mounting holes act as key holes for easy installation. Includes 10-32 black rack screws with integral-factory installed, mar resistant black nylon washer, as well as a mounting template for easy installation.

SIDE PANELS LOCK KIT

Just Added

For higher security, the quarter turn fasteners on the side panels can be replaced with this key locking version. Good for 1 rack (2 locks per side panel).

Mfg. Part No.	Kit Contents	Stock No.	Price Each
● CSPQTRL	4 Quarter Turn Locks and 8 Keys	09H1399	32.21

(90397)

C2 RACK TOPS

Just Added

Solid Top

Vented Top with Cable Entry

Raised Top

Vented Top

- 14-gauge steel construction
- Supplied with mounting hardware
- Finish matches **C2 series** rack frames in the same rugged, textured powder paint

SOLID TOP

Used on racks where protection from dust or falling objects is required.

Mfg. Part No.	Color	Fits Rack Depth (in.)	Stock No.	Price Each
● C2T1923SBK1	Black	23.63	01C6954	20.58
● C2T1923SCG1	Gray/Beige	23.63	91F2214	20.58
● C2T1931SBK1	Black	31.50	98B6053	32.51

CABINETS & RACKS

"ZERO SPACE" FIXED VENTED SHELVES

Just Added

Features

- Rugged textured black powder paint finish
- No obstruction to front panel space or equipment
- Mounts on two pairs of panel rails (front and back)
- Includes all mounting hardware

The **RZVS series** are heavy duty, 14 gauge steel shelves which are vented to provide improved upward heat movement. Shelves require no front rail mounting or front rack space. Rear lip is covered with a rubber channel to avoid equipment scratching and cable chaffing. Rear lip also folds up for extra strength and acts as a rear equipment retainer. Sides are slotted for easy adjustment and fold up for easy hardware installation. Includes two equipment stops which can be fastened anywhere on the shelf.

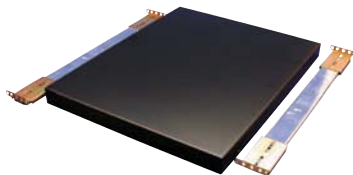

Mfg. Part No.	Shelf Depth	Shelf Width	Stock No.	Price Each

RAIL-MOUNTED ADJUSTABLE SHELVES

Just Added

The **DNRMA series** adjustable shelves are constructed of 14 gauge steel. They mount to panel rails using 5.25" (3U) of vertical panel space and 19" of horizontal panel space. Movable side brackets allow mounting inside or outside of rack at four different depths. Suitable for open relay racks and racks where panel mounting is available. Finished in rugged black textured powder paint. Mounting hardware required.

ADJUSTABLE RACK SUPPORT ANGLES

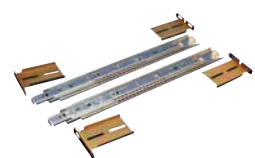

Mfg. part no. RASA support angles mount from front to back, on 19" rack rail (on the accessory flange), to support heavy equipment and reduce load on equipment front panel. Slots allow up/down or front/back adjustments. Heavy duty, made of 14-gauge steel. Dimensions: 1.75 x 1.75". Finish: textured black powder paint. Mounts on two pair of mounting rails (front and back). **Sold in pairs.** Order mounting hardware separately; go online or call.

Mfg. Part No.	Length	Stock No.	Price Each
● RASA12BK3	9.97"	31C1580	24.38
● RASA16BK3	14.95"	93B7338	26.59
● RASA22BK3	20.95"	93B7347	30.00
● RASA28BK3	28.00"	25C1144	32.80

(6997)

EQUIPMENT SLIDES

Mfg. part no. RSLIDE slides mount to the front and rear 19" rack panel rails. Occupies only 1U (1.75") of panel height. Heavy-duty, ball-bearing type mechanism. Converts fixed shelves **mfg. part no. RASC** on page 2172 to a pull-out shelf. **Sold in packages of 2.**

Mfg. Part No.	Panel Depth	Capacity	Stock No.	Price Each
● RSLIDE12	12"	120 lbs.	66F8016	62.09
● RSLIDE16	16"	130 lbs.	34C3341	64.72
● RSLIDE22	22"	120 lbs.	66F8018	68.64

THERMAL MANAGEMENT PRODUCTS

RACK COOLING FAN TRAYS

Features:

- 3 Fans per Row
- Ball Bearing Motors Rated up to 105 cfm per Fan
- Low Noise Level
- Removable Rear Support Brackets (On 2- and 3-Row Models)
- 115VAC Operation, 50/60 Hz
- Single Panel Space (1.75")
- Optional On/Off Switch
- 6' 14/3 STJW Cord with Molded 3 Prong Plug Included

FT series fan trays deliver cooling air by localizing fan placement in the rack. Units mount in standard 19" racks and are 17" wide.

WITHOUT ON/OFF SWITCH

FILTER FANS AND EXHAUST GRILLS

Filter fans provide protection against overheating of electrical/electronic components. Exhaust filters can be used with a fan or alone for passive ventilation. A screwless "click and fit" system reduces installation time significantly. A black fire-retardant plastic grille enhances the appearance of the enclosure. Fans are 115V/60Hz. CE compliant.

FILTER FAN BOXES AND GRILLS

Filtered fan box pulls air into enclosure and the filter grill is used as an air outlet. Fan box includes ball bearing fan with UR/CE listing, 115VAC motor, 6" wire leads, filter, and stainless steel grill. Filter is aluminum coated. Filter grills include grill and aluminum coated filter only.

HEATERS, THERMOSTATS, AND BREATHING KITS

SHG

SHGL

SKT

Mfg. part no. SHG heaters protect against low temperatures, condensation and corrosion in electrical/electronic enclosures by maintaining a stable temperature environment. Heaters are 115V/50/60Hz. Mfg. part no. SHGL heater fans are similar to mfg. part no. SHG heaters but have an axial fan for forced air circulation. Mfg. part no. SKT thermostats control and monitor air temperature. Mfg. part numbers with suffix NC (Normally Closed) for the control of heaters and heater fans. Mfg. part numbers with suffix NO (Normally Open) for the control of cooling units such as filter fans. All dimensions are 2.4H x 1.3W x 1.4"D. Mfg. part no. SDA412 breather kit (pressure compensation plugs) provides for controlled pressure compensation due to temperature variations (e.g., night/day operations) and protect against dust and humidity. Two plugs per cabinet in opposite locations are recommended. 2.6" diameter x 1.2" height. IP45 protection. CE compliant.

NEMA TYPE 1 SCREW COVER PULL BOXES AND NEMA TYPE 3R WIRING/JUNCTION BOXES

A Pentair Company

NEMA Type 1 screw cover enclosures are designed for use as junction and pull boxes in commercial and general industrial applications. Choice of steel with ANSI 61 gray polyester powder painted finish inside and out over phosphatized surfaces, or galvanized steel with natural finish. Boxes available with or without knockouts. All versions are UL listed 50 file no. E27525 Type I, CSA certified file no. LL42184 Type I, NEMA/EEMAC Type I rated, IEC 60529, IP30. NEMA Type 3R junction boxes provide protection in outdoor installations against rain, sleet and snow or indoors against dripping water. Constructed of galvanized steel with ANSI 61 gray polyester powder painted finish inside and out over phosphatized surfaces. Feature knockouts on bottom, drip shield top, seam-free sides, front and back and provision for padlocking. UL listed 50 file no. E27525 Type 3R, CSA certified file no. E27525 Type 3R, NEMA/EEMAC Type 3R rated, IEC 60529, IP32.

NEMA TYPE 1 STEEL ENCLOSURES AND ACCESSORIES

Designed for use in control and instrumentation applications in areas which do not require oil- or dust-tight specifications. Tough steel construction with ANSI 61 gray powder painted finish inside and out over phosphatized surfaces. Doors have slotted flush latches and butt hinges, except large enclosures which have continuous hinge. Large enclosures feature door and body stiffeners for extra rigidity. All enclosures have mounting holes on back and provisions for mounting optional white solid or gray perforated steel panels; order separately below. Meets NEMA Type 1 and IEC 60529, IP30 classification. UL listed, CSA certified. Order accessories separately below.

WALL-MOUNT NEMA TYPE 12 AND 13 JUNCTION BOXES

Single-door, NEMA Type 12 and 13 steel and aluminum wall-mount enclosures are designed for indoor use to protect electrical, electronics or pneumatic components from dust, dirt, oil and water. Choice of **CH series** continuous hinge or **SC series** screw cover designs, both constructed of 14- or 16-gauge steel and coated with an ANSI 61 gray polyester powder finish inside and out. **CHAL series** aluminum, continuous hinge boxes have smooth, brushed finish and feature stainless steel screws and clamps that secure cover and assure watertight seal. All boxes have an oil-resistant gasket and feature continuously welded and ground smooth seams. Weldnuts provided for mounting optional white 14-gauge steel panels; *order separately below*. All are rated NEMA Type 12 and 13 and IEC60529, IP65. UL listed, CSA certified.

WALL-MOUNT NEMA TYPE 4 STEEL AND NEMA TYPE 4X STAINLESS STEEL JUNCTION BOXES

Single-door, NEMA Type 4 steel and NEMA Type 4X stainless steel wall-mount enclosures are designed for indoor and outdoor use to protect electrical, electronics or pneumatic components from dust, dirt, oil and water. Feature continuous hinge to facilitate easy access. CHNF series boxes are constructed of 14- or 16-gauge steel and coated with an ANSI 61 gray polyester powder finish inside and out. Rated NEMA Type 3, 4, 12 and 13. CHNFSS series boxes manufactured from 14-gauge Type 304 stainless steel and have a smooth #4 brushed finish. Ideal for highly-corrosive environments. Rated NEMA Type 3, 4, 4X, 12 and 13 and meet Type 3RX requirements. All boxes have an oil-resistant gasket and feature continuously welded and ground smooth seams. Weldnuts provided for mounting optional white 14-gauge steel panels, order separately below. All are rated IEC60529, IP66, UL listed, CSA certified.

NEMA ENCLOSURES

TRADITIONAL STYLE WALL-MOUNT NEMA TYPE 12, 13, 4 STEEL AND TYPE 4X STAINLESS STEEL AND ALUMINUM ENCLOSURES

NEMA Type 12, 13 Painted Steel

NEMA Type 4 Painted Steel

NEMA Type 4X Stainless Steel or Aluminum

This traditional styled, single-door wall-mount offering includes mild steel, stainless steel and aluminum enclosures that protect against a variety of environmental conditions. All are gasketed and have a continuous hinge to facilitate easy access. All feature a rolled flange around three sides of the door and all four sides of the enclosure opening to exclude liquids and other contaminants. All come complete with a data pocket and hasp and staple for padlocking. UL listed, CSA certified. *Order white steel panels, listed in table below, separately on page 2187.*

SINGLE-DOOR NEMA TYPE 12 AND 13 STEEL ENCLOSURES

Designed for indoor use to protect components from dust, dirt, oil and water. Manufactured from mild steel coated with an ANSI 61 gray polyester powder finish inside and out. Meet NEMA Type 12 and 13 and IEC 60529 IP66 requirements.

SINGLE-DOOR NEMA TYPE 4 STEEL ENCLOSURES

Designed for both indoor and outdoor use to protect components from dust, dirt, oil and hose-directed water.

Manufactured from mild steel coated with an ANSI 61 gray polyester powder finish inside and out. Meet NEMA Type 3, 4, 12 and 13 and IEC 60529 IP66 requirements.

SINGLE-DOOR NEMA TYPE 4X STAINLESS STEEL ENCLOSURES

Designed to protect electrical components in corrosive environments in both indoor and outdoor settings. Manufactured from 14-gauge Type 304 stainless steel coated with a smooth #4 brushed natural finish. Meet NEMA Type 3, 3R, 3RX, 4, 4X, 12 and 13 and IEC 60529 IP66 requirements.

SINGLE-DOOR NEMA TYPE 4X ALUMINUM ENCLOSURES

Ideal for providing lightweight protection in corrosive environments in both indoor and outdoor settings. Manufactured from Type 5052 H-32 aluminum with a smooth brushed natural finish. Meet NEMA Type 3R, 4, 4X, 12 and 13 and IEC 60529 IP66 requirements.

INLINE® AND CONCEPT® NEMA TYPE 12/4 AND 12/4X WALL-MOUNT PAINTED STEEL AND STAINLESS STEEL ENCLOSURES

Inline® Enclosures

Concept® Enclosures

Inline® and Concept® wall-mount, single-door enclosures provide protection for electrical components in both indoor and outdoor environments. Enclosures are gasketed, have a body flange trough to exclude liquids and can be direct-mounted or mounted using external wall-mounting brackets which are required to maintain UL listed/CSA certified external mounting requirements. Choice of solid-door or window-door models which feature 180° door

opening and removable hinge pins. Windows are clear polycarbonated and mounted flush with cover surface. All models come complete with installation instructions and hardware, including: panel mounting screws, grounding hardware, and sealing washers for wall-mounting holes. All enclosures are UL listed, CSA certified, VDE approved. Choose from a wide array of accessories including 12-gauge steel panels with white painted finish; *ordered separately below.* Stainless steel enclosures with window also available; *go online or call*

INLINE® WALL-MOUNT ENCLOSURES

Inline® instrumentation enclosures protect instrumentation devices and electrical components from dirt, dust, oil and water. Manufactured from 16 gauge steel with RAL 7035 textured light-gray polyester powder painted finish. Solid door enclosures meet NEMA Type 4 and 12, VDE IP66 and IEC 60529 IP66 requirements. Enclosures with window-door

styling meet NEMA Type 12, VDE IP55 and IEC 60529 IP66 requirements. Inline® Type 304 stainless steel instrumentation enclosures protect components from corrosive environments. These solid door wall-mount enclosures have a smooth #2 brushed finish and meet NEMA Type 4, 4X and 12, VDE IP66 and IEC 6029 IP66 requirements.

ACCESSORIES

Mfg. part no. CWHNL, CWHK and CWHPTO handles replace the standard slotted insert on all Concept® wall-mount enclosures. A die-cast zinc keylock handle provides easy access and security. The zinc-plated padlock handle accommodates a padlock up to a 3/4" locking bar. All three latch systems feature black plastic handles and can be converted from clockwise to counter-clockwise opening. Mfg. part no. ADP1 and ADP2 data pockets provide convenient storage for documentation inside solid-door enclosures. Constructed of dark-gray, high-impact thermoplastic with cutout areas for easy access and visibility to contents. Each data pocket includes mounting hardware. Mfg.

part no. CMFK and CMFKSS mounting bracket kits are field installable. Stainless steel brackets are rated to NEMA Type 4X. Each kit includes 4 brackets and hardware. Mfg. part no. ADSTOPK door stop kit for NEMA Type 12 enclosures secure door in the open position. Can be installed at the top or bottom of door that opens horizontally. Door opening angle can be adjusted by means of a wing nut. Stop arm slides neatly out of the way when door is closed. All parts are zinc-plated steel. Mounting hardware included. NOTE: door stop kit should not be installed on enclosures configured with a swing-out panel or swing-out rack frame.

CONCEPT® SLOPED TOP WALL-MOUNT NEMA TYPE 4/12 ENCLOSURES

- 20° sloped top

Concept® sloped top wall-mount enclosures protect sensitive electronic equipment against harsh industrial environments. The sloped top sheds articles placed on top and also provides a mounting surface for operator controls. Rear mounting holes provide means to mount directly to a machine, or wall, or may be used with optional mounting brackets; go online or call Newark. Meet NEMA Type 4, 12, and 13, VDE IP66 and IEC60529, IP66.

Controls shown in image are not sold with the enclosure

NEMA ENCLOSURES

NEMA TYPE 4X FIBERGLASS WALL-MOUNT ENCLOSURES

Hinged Window and Solid Door with Latches

Overlapping Solid Door with Latches

ULTRX® Solid Door

Flanged Solid Door

Fiberglass wall-mount enclosures provide protection against corrosive environments in both indoor and outdoor settings. All feature a continuous hinge to facilitate easy access. Choice of screw-cover units, quick-release latch

models, featuring solid door or scratch-resistant window door. All models are UL listed, CSA certified with a flammability rating per UL 508. Order white steel panels, listed in tables below, separately on page 2187.

SMALL HINGED COVER WALL-MOUNT ENCLOSURES

Designed for use as a junction box or instrument housing these light gray fiberglass polyester enclosures are available with solid door or polycarbonate window. Feature a seamless foam in-place gasket and doors that fasten with either screws or quick-release latches. Meet NEMA Type 4, 4X, 12 and 13 and IEC 60529 IP66 requirements.

QLINE® E AND I POLYCARBONATE NEMA TYPE 4X ENCLOSURES

Contoured bodies with flush cover screws for attractive, contemporary appearance. Can be used as insulated electrical junction boxes, terminal wiring boxes, instrument housings and as housings for electrical controls in wet, dusty and corrosive environments that may be subject to occasional submersion. Constructed of high-impact polycarbonate material that's RAL 7035 light gray and easily punched, drilled, filed, or sawed. Choice of clear or opaque polycarbonate covers that feature a molded-in hole for a wire lead. Seamless foam-in-place gasket provides a watertight and dust-tight seal. Molded internal pads for mounting zinc-plated steel panels; *order separately below.* Flammability rated UL 508. **E series** units meet NEMA/IEC Types 4, 4X, 6, 12 and 13 and IEC60529, IP67 requirements. **I series** units meet NEMA/IEC Types 4, 4X, 12 and 13 and IEC60529, IP66 requirements. All enclosures are UL listed, CSA certified. *Order mounting bracket kit and hinge kit separately below.*

NEMA ENCLOSURES

22.5mm AND 30.5mm PUSHBUTTON AND CONSOLE/ET ENCLOSURES

These pushbutton and Console/ET enclosures provide protection against water, oil, and dust. Captivated cover screws thread into sealed wells. Units come with grounding stud in body and oil-resistant gasket and adhesive. All are UL listed, CSA certified.

PUSHBUTTON ENCLOSURES

Pushbutton enclosures feature "4-way" holes designed to accept all brands of oiltight 22.5 or 30.5mm pushbuttons, switches, and pilot lights. Choice of tough steel construction with ANSI 61 gray polyester powder painted finish (meets NEMA Types 12, 13 and IEC 60529, IP65 requirements) or corrosion-resistant stainless steel with smooth #4 brushed natural finish (NEMA Types 4X, 12, 13 and IEC 60529, IP66 requirements).

SLOPING FRONT PUSHBUTTON ENCLOSURES

Sloping front pushbutton enclosures feature "4-way" holes designed to accept all brands of oiltight 22.5 or 30.5mm pushbuttons, switches, and pilot lights. Tough 14-gauge steel construction with ANSI 61 gray polyester powder painted

finish. Meets NEMA Types 12, 13 and IEC 60529, IP65 requirements. Large enclosures with standard mounting brackets removed are ideally suited for mounting on pedestals; *order separately below.*

CONSOLE/ET SLOPING FRONT ENCLOSURES

Console/ET sloping front enclosures designed to house a variety of electronic control and instrumentation devices. Feature control panel attached with continuous hinge along bottom edge. Flexible design allows for mounting on either of two sides, creating control surfaces of 30° or 60°. Can be mounted on desktops and other flat surfaces. Ideally suited for

mounting on pedestals; *order separately below.* Choice of tough steel construction with ANSI 61 gray polyester powder painted finish or corrosion-resistant Type 304 stainless steel with smooth #4 brushed natural finish. Both meet NEMA Type 12 and IEC 60529, IP65 requirements.

NEMA ENCLOSURES

ARC FLASH
SAFETY
SYSTEMS

Arc flash events may happen when an electrical fault occurs within the confined space of an enclosure. Often triggered by opening doors to access controls, the resulting explosion can cause devastating personal injury and extensive equipment damage. Conventional compliance with safety standards specifies that only highly-trained personnel with fire retardant, protective gear and non-conductive wands may breach enclosures within a "flash protection boundary" established by NFPA 70E. This method is not only potentially hazardous, but entails considerable compliance costs and may require a production shutdown to monitor controls or initiate a simple programming change. The components of the Arc Flash Safety System isolate workers from energized equipment within the enclosure while meeting NFPA 70E safety standards.

INTERSAFE™ TYPE 4/4X/12 DATA INTERFACE PORTS

The INTERSAFE™ Data Interface Ports are a solution for the intersection of convenience and safety. Ports are mounted on an enclosure to allow access to the programming devices inside the enclosure without opening the enclosure door. Feature frame and door assembly with aluminum backplate. All standard configurations include a GFCI or standard duplex receptacle with a 5-amp circuit breaker for added safety. Door gasket (between the door and plate assemblies) and plate gasket (between the plate assembly and the enclosure) together provide a tight seal. Quarter-turn latch with screwdriver slot and padlock hasp on all configurations. Continuous hinges attach to the door frame to allow easy door removal. An important accessory for use with a broad range of enclosures, these ports maintain compliance with the NFPA 70E arc flash protection directive. 120 VAC receptacles and programming connectors are mounted to the plate in 75 standard configurations. Modifications and customization available to accommodate a wide variety of additional connectors, [go online or call](#).

SEQUESTTM EXTERNAL
DISCONNECT ENCLOSURES

NEW TECHNOLOGY

Stand-alone Retrofit Kit

Package with Main Control Enclosure

- Interlocks with doors of main control cabinet when the disconnect switch is powered ON
- Provision for pass-through power into the main cabinet — blank plate for customer modification
- Preferred disconnect cut out
- Quarter-turn screwdriver slot latch
- Hidden hinges
- Bonding provision on door

External disconnect enclosure to retrofit disconnect cabinets to isolate incoming power from the main enclosure, mitigating the danger of arc flash occurrences when working on interior components. Disconnect switch is moved to the SEQUEST enclosure with power pass-through to the main control cabinet. 16 gauge steel construction. Continuously welded and ground seams all around. Hinged on right side, ANSI 61 gray exterior and interior. Conductive back panel and installation hardware and templates included. Meet NEMA/EMAC Type 12, IEC 60529, IP55 requirements. Meet JIC standards EGP-1-1967 and EMP-1-1967. Optional terminal plates and replacement conductive panel available; order separately below.

HOL-TITE[®] OIL TIGHT
HOLE SEALS

Hole plugs seal unused pushbutton holes, conduit openings and knockout holes against dust, oil and water. Seals made of galvanized steel have oil-resistant gasket and are secured with a 10-32 x 5/8" threaded stud and plated wing nut. 16-gauge steel with ANSI 61 gray powder paint finish. Stainless seals have polished front surface, are made of series 300 stainless steel. 10-24 x 5/8 stainless steel stud with stainless wing nut. 16 gauge stainless steel backplate. Both have oil-resistant gaskets.

A SERIES STEEL PANELS

Steel panels are 14 or 12 gauge and have a painted white finish. Larger panels have flanges on two or four sides. Panel mounting hardware is furnished with all enclosures which accept these panels. For additional panel sizes and material options of Stainless Steel, Aluminum, Galvanized, or composite, please call Newark In One.

SIDE- AND TOP-MOUNT AIR
CONDITIONERS FOR
ENCLOSURES

All air conditioner models operate at 115VAC, 50/60Hz, unless otherwise noted. Units use a CFC-free or environmentally-safe refrigerant. All models are UL/cUL Type 12 rated. 230VAC units are also available; go online or call.

SUBCOMPACT SIDE-MOUNT AIR CONDITIONERS

T15 series subcompact single phase units are ideal for cooling smaller enclosures with 8" or greater depth, making it easily installed in wall-mount enclosures or enclosures with narrow side walls. Each equipped with a thermostat control, EMI/RFI noise suppressor, condensate management system with base pan side drain and reusable/washable air filter. Feature high-performance, industrial-grade ball-bearing fans to provide maximum heat transfer. Max. ambient temperature: 125°F, 52°C. Popular RAL7035 smooth light gray polyester powder finish over steel cabinet body. Units include power cord with standard grounded outlet plug, built-in hanging brackets, mounting hardware and gasket, and instruction manual.

Mfg. Part No.	Dimensions H x W x D (In.)	Supply Voltage (Max.)	Full Load Amps	BTU Cooling Rating (Max.)	Stock No.	Price Each

SIDE-MOUNT AIR CONDITIONERS

Compact, mid-size and full-size single phase units are easily installed on door, side or front of enclosure with supplied hanging or mounting brackets. Each equipped with a thermostat control that offers convenient digital display of enclosure temperature and high-temperature alarm. Feature high-performance ball-bearing fans or centrifugal blowers. Max. ambient temperature: 125°F, 52°C. Popular RAL7042 smooth gray polyester powder finish on cabinet body and RAL 7035 light gray grille. Mounting gasket and instructions included.

PROAIR™ CR23, CR29 AND CR43 SERIES SIDE-MOUNT AIR CONDITIONERS

All Proair™ single phase units can be mounted on door, side, or front of enclosure. Each equipped with a thermostat control and EMV/RFI noise suppressor. Hinged front cover permits units to be easily serviced and maintained. High-performance fans and blowers are ideal for densely packed enclosures. Max. ambient temperature: 131°F, 55°C. Mild steel cabinet with RAL7035 light gray polyester powder finish. Mounting hardware, gaskets, mounting template and instructions included. All units are approved for outdoor application NEMA Type 3R. Stainless steel NEMA Type 4X units are also available; *go online or call*.

TOP-MOUNT AIR CONDITIONERS

Top-mount, single phase units are ideal for use where there is little or no clearance around the enclosure. Equipped with a thermostat control that offers convenient digital display of enclosure temperature and high-temperature alarm. High-performance CFM ball-bearing centrifugal blowers. Max. ambient temperature: 125°F, 52°C. Popular RAL7042 smooth gray polyester powder finish on cabinet body and RAL 7035 light gray grille. Mounting gasket and instructions included.

COOLING FAN AND EXHAUST PACKAGES

Cooling Fan

Thermal Exhaust Pkg.

For use in enclosures where space is limited and reliable filtered airflow is required. Powered by 115VAC, 50/60Hz single-phase motors. The fan package is designed to be the air inlet in cooling systems. Exhaust grille and filter provide air outlet. 230V fan packages available; *go online or call*.

COMPACT COOLING FANS

For use in enclosures where space is limited and reliable cooling is required. Excellent for general air circulation. Powered by 115VAC, 60/50Hz single phase motors and available in three sizes with nominal airflows of 100, 240, and 560cfm. Fans have leadwires with ends stripped 1/2" (12mm). Ideal for applications where compact and quiet service is desired. Fan bracket designed to provide easy mounting of cooling fans inside enclosure. One finger guard is furnished (an additional finger guard is recommended for maximum safety. All mounting hardware is included. 230V compact cooling fans available; *go online or call*.

LOUVER PLATE KITS

Louver Plate Kit

Filter

Designed to provide ventilation in enclosures where excessive internal heat or excessive moisture is a problem. Gasketing or sealing the perimeter of the louver plate reduces problems associated with moisture intrusion. Made from 14 gauge steel with an ANSI gray polyester powder finish over phosphatized surfaces or 316 stainless steel. Aluminum air filters provide good arrestment of airborne dust and dirt. Hardware is furnished for mounting.

ELECTRIC HEATERS

Designed to protect sensitive mechanical, electrical and electronic component equipment from the harmful effects of condensation, corrosion and low temperatures. Thermostatically controlled fan-driven heaters maintain a stable temperature within enclosures. Adjustable from 0° to 100°F (-18°C to 38°C). Heated air is discharged through the top of anodized aluminum housing. Ball-bearing fan runs continuously for even temperature distribution. Terminal strip with clamp connector accepts both solid and stranded wire. Includes four 10-32x self-tapping screws. Additional 230V models are available; *go online or call*. UL recognized, CSA certified, CE compliant.

THERMAL MANAGEMENT PRODUCTS • CABINETS & RACKS

TEMPERATURE CONTROL SWITCHES
(THERMOSTATS)

These easy to install thermostats are designed to regulate and monitor air temperature in switch-gear enclosures that are set up to operate with heaters, fans, filter ventilators, heat exchangers, and/or signal transmitters. **Mfg. part no. A-TEMNC** (normally closed) is specifically designed for use with heaters while **mfg. part no.** (normally open) is designed to control fans, filter ventilators, or for switching signal transmitters in the event of overheating. Both models have a bimetallic adjustable set point range of 30° to 140°F. Connections consists of tubular screw terminals for 14 AWG (0.04 in²). Plastic housing is rated UL94-V0. Dimensions: 2.37H x 1.31W x 1.55"D. Protection rating: IEC IP30, UL recognized CSA certified. **NOTE:** switching capacity information, in table below, applies to both **mfg. part no. ATEMNC** and **ATEMNO** switches.

Mfg. Part No.	Switching Capacity			Stock No.	Price Each
	Amp	Volts	Load		
ATEMNC	15 16	120VAC 250VAC	Resistive Resistive	92F8684	64.85
ATEMNO	1 10 1	120 - 250VAC 12 - 24VDC 12 - 24VDC	Inductive Resistive Inductive	92F8685	64.85

TAMPERPROOF
THERMOSTATS

Just Added

Specifications

- Dimensions (H x W x D): 1.85" x 1.3" x 1.3"
- Switching capacity: 5A res / 1.6A ind @ 240 VAC
- Max. inrush current: 10 A
- 2-pole terminal for AWG 14 max.
- Operating temp: -20°C to 80°C

The **FT 011 series** are compact thermostats that open or close as the temperature rises. Normally closed thermostats come with a red module. Normally open thermostats come with a blue module. Sensor element is thermostatic bi-metal. Plastic housing is DIN rail mountable.

(87980)

HYGROSTAT

The **MFR 012 series** is designed to control the relative air humidity inside of enclosures. When connected to an enclosure heater, dehumidifier, it will turn the heater on at the set humidity level in order to raise the dew point. This helps prevent damage and malfunction of electronic components caused by condensation and corrosion. The **MFR 012 series** can also be used to control cooling fans, warning lights or other devices. Product mounts on standard DIN rail. Switching capacity: 5A resistive (0.2A inductive).

DIMENSIONS: 2.64" (67mm)H x 1.97" (50mm)W x 1.5" (38mm)D

Mfg. Part No.	Description	Humidity Range	Switching Voltage	Stock No.	Price Each
01220.0-00	Humidity Control, change-over contact	35 to 95% RH	20VDC-230VAC	01M9583	131.04

(87981)

HYGROTHERM

The **ETF 012 series** senses the ambient temperature and relative air humidity. Depending on which contact combination is chosen, it then turns on or off a connected device if either the temperature is below, or the humidity above the set point. The integrated LED in each adjustment knob is lit indicating the active function. Product mounts on standard DIN rail. Switching capacity: 8A resistive (3A inductive).

DIMENSIONS: 3.03" (77mm)H x 2.36" (60mm)W x 1.69" (43mm)D

Mfg. Part No.	Description	Temperature Range	Humidity Range	Supply Voltage (VAC)	Stock No.	Price Each

EXPLOSION PROOF
HEATERS AND
THERMOSTATS

REx 011

CREx 020

The **REx 011 Ex-proof Thermostat series** and **CREx 020 Ex-proof Heaters series** are suitable for use in enclosures which are applied in areas with explosion hazard. Due to the high switching capacity of the thermostat, heaters can usually be directly connected and switched, without the need for additional relays. Heaters and thermostats are DIN rail mountable and are certified to comply with ATEX 6074, EExd IIC. Temperatures ratings are: T6 for the thermostat, 50W heater is T5, 100W heater is T4. DC versions available, go online or call.

PTC HEATERS

Just Added

CSF / CS 060

CSK 060

The **060 series** are DIN rail mountable heaters with a self-regulating PTC resistor heating element. These PTC heaters maintain minimum operating temperatures in enclosures. They also help to prevent failure of electronic components caused by condensation and corrosion. The **CSF 060 series** come with integral fixed point thermostat. Heaters are encased in a double insulated plastic housing eliminating the need for a ground connection. Heaters have low surface temperatures and operate on a wide voltage range (120-240VAC).

SMALL PTC
ENCLOSURE
HEATERS

RC 016

HGK 047

The **RC 016** and **HGK 047 series** heaters are designed to prevent condensation in small enclosures or to maintain minimum operating temperatures of electronic components in camera housings, actuators, valve and pump controls, telecom receivers/transmitters, and control boxes. PTC (Positive Temperature Coefficient) heating elements provide a "self-regulating" and "self-limiting" characteristic, making the heater safer and more energy efficient. The **RC 016** heater mounting flange dimension is 0.49" (12.5mm).

FAN HEATERS

The **CR 027 series** is a compact, high capacity PTC technology fan heater for large enclosure applications. Fan heaters are used to maintain minimum operating temperatures in enclosures. This helps prevent failure of electronic components caused by condensation and corrosion. PTC technology uniquely adjusts heating power to ambient temperature. The **CR 027 series** comes with an integral thermostat making it easy to install on standard DIN rail.

HIGH PERFORMANCE
FAN HEATERS

03051.9-00

13051.9-00

The **CR 030 series** and **CR 130 series** compact high-performance fan heaters prevent formation of condensation and provide an evenly distributed interior air temperature in outdoor enclosures and control cabinets. The **CR 130 series** can be panel or DIN rail mounted. The **CR 030 series** foot mounting capability allows installation on the base panel of enclosures. The plastic heater enclosure provides a UL double insulated level of protection against electrical shock. The **CR 030 series** fan heater includes an integrated thermostat or hygrostat for temperature or humidity control.

THERMAL MANAGEMENT PRODUCTS

FILTER FANS AND EXHAUST FILTERS

The **FF018 series** filter fan and the **EF118 series** exhaust filter have been purposefully designed to provide more value than alternative products. Design features include: high-tech adhesive mounting or screw mount, high airflow, quiet operation, minimum ingress, protection against falling liquids or dust. **Mfg. part no. 01803.0-01** is a 4 fan design to provide redundancy. EMC version available, *go online or call*. Dimensions in table below are cutout dimensions. Depth is ingress dimension only. Cutout template included for easy installation.

OUTDOOR FILTER FANS, EXHAUST FILTERS

The **FF01821 series** outdoor filter fan and the **EF11821 series** outdoor exhaust filter are the perfect solution to the problem of providing ventilation to outdoor enclosure applications. A locking compartment door allows access to the filter media without the need to access the enclosure interior. This product is IP 55 rated. The housing is RAL 7035, UL94H-B rated, and impact resistant plastic. Cover is 8.8" (224mm)H x 6.5" (165mm)W x 2.6" (65mm)D. Cut out dimension is 4.9" (125mm) x 4.9" (125mm). Ingress is 2.4" (62mm).

MULTI-PURPOSE PROTECTIVE COVER

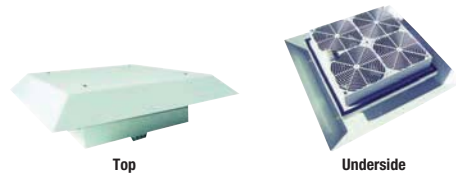

The **MA086 Multi-purpose Protective Cover series** provides a tamper-proof access port to devices such as special connectors, security keypads, power outlets and any other devices that you would like to allow access to while restricting access to the main enclosure interior. Housing is RAL 7035, UL94H-B rated, impact resistant plastic.

COVER DIMENSIONS: 8.8" (224mm)H x 6.5" (165mm)W x 2.6" (65mm)D

Mfg. Part No.	Description	Stock No.	Price Each
● 08611.0-00	Multi-purpose Protective Cover	01M9713	63.58

(89060)

TOP MOUNT FILTER FANS AND EXHAUST FILTERS

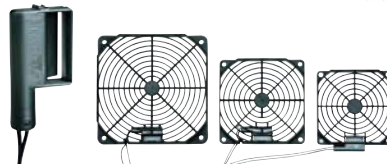

The most effective way to evacuate heat from electrical and electronic cabinets is to utilize an **RFF018 series** top mount filter fan or **REF118 series** exhaust filter. The ready to connect, low-noise filter fan utilizes four smaller axial fans instead of one large one, improving reliability and maintaining continuous operations even if one of the fans should fail. The **REF018 series** cabinet top exhaust filter provides passive ventilation. Frame is RAL 7035 powder coated steel. Fan housing is RAL 7035 UL94V-0 impact resistant plastic. Cover dimension is 15.5" (394mm). The required cutout dimension is 9.8" (250mm). Overall height of ventilation device above cabinet top is 2.4" (62mm). Ingress dimension is 1.7" (44mm).

Mfg. Part No.	Description	Stock No.	Price Each
● 01851.0-00	Roof Filter Fan, 223 cfm, 120VAC	82K8683	381.57
● 11850.0-00	Roof Exhaust Filter	82K8825	146.12

(88061)

AIR FLOW MONITORS

The **LC013/LCF013 series** air flow monitor, also referred to as a fan filter alarm switch, provides a simple but reliable means to indicate positive or negative air flow of fans. When properly installed and connected in series with an optical (i.e. LED) or audible signaling device, a bi-directional switch (10W resistive maximum capacity) will activate an electrical contact if the air flow of the fan falls below 8.2 ft/s, thus either turning the signaling device on or off. The **LC013 series** is a stand alone device furnished with a clip which allows mounting to any standard finger guard. The device is also offered integrally mounted on three standard size non-metallic finger guards, 80x80, 92x92 and 120x120mm. A universal mounting clamp is also furnished. All featured product switch function is normally closed. Normally open switch function is available. See full line of fans; *go online or call*.

LC013 SERIES DIMENSIONS: 1.3" (34mm)H x 0.7" (17.5mm)W x 0.3" (7.5mm)D

Mfg. Part No.	Description	Stock No.	Price Each

CABINETS & RACKS • THERMAL MANAGEMENT PRODUCTS

ENCLOSURE AND
CABINET LIGHTS

The **SL025 series** light was designed to fit in tight spaces in enclosures. It features an optional integrated receptacle, so that electrical devices (e.g. power tools) can be easily plugged in when needed. The standard light can be screw-mounted in a variety of positions, or the light can be fitted with an optional magnet mount. It is available with either an on/off switch or a motion sensor which eliminates the cost of wiring to a door switch. The motion sensor was designed so it can be used in enclosures with glass doors and not be activated by movement outside the enclosure.

DIMENSIONS: 13.6" (345mm)L x 3.6" (91mm)W x 1.6" (40mm)D

Mfg. Part No.	Power (W)	Voltage (VAC)	Description	Stock No.	Price Each

(87967)

19" RACK MOUNT
LIGHTS

The **SL 025 series** 19" light is suitable for lighting in 19" racks (e.g. for keyboards). The light, requires only one rack unit (1U = 1.75" or 44.5mm) in height. Additionally, it is fitted with a reflector which serves as a glare shield, thereby illuminating the area below the light only. The light also features an optional integrated receptacle, allowing for the use of additional electrical devices, such as power tools.

Mfg. Part No.	Power (W)	Voltage (VAC)	Description	Stock No.	Price Each
● 02524.0-05	11	120	19" Light with on/off switch, w/ receptacle (USA/Canada)	26M8319	160.53
● 02527.0-11	11	120	19" Light with on/off switch, no receptacle	01M9634	123.74

(87994)

STEGO-FIX MOUNTING AID

The **STEGO-FIX** is specially designed to make mounting of smaller DIN rail mountable components easier. It can be used whenever the installation of a DIN rail is impractical, or when there is not enough space left in an enclosure. Because of its industrial grade self adhesive it can be installed much easier and quicker than a conventional DIN rail, without the effort of hole drilling and screw mounting. This is especially practical for subsequent changes or additions in an already equipped enclosure. **STEGO-FIX** can hold components up to 1.1 lbs. in weight. Some of the many applications include the mounting of timing relays, series terminals, cable channels and even small heaters. In addition, DIN rails can be mounted simply by using several **STEGO-FIX** units. If the weight of attached components exceeds the load limit, or if a more secure mounting is desired (e.g. on rough surfaces), it can also be screw-mounted. All that is necessary to install **STEGO-FIX** is a smooth and clean surface. The initial adhesive power is 40%, and after 24 hours, it has its full holding power of 1.1 lbs. **Sold in packages of 5.**

DIMENSIONS: 1.5" (38mm)H x 1.7" (43mm)W x 0.55" (13.5mm)

(88080)

WEATHERPROOF PRESSURE
COMPENSATION DEVICES

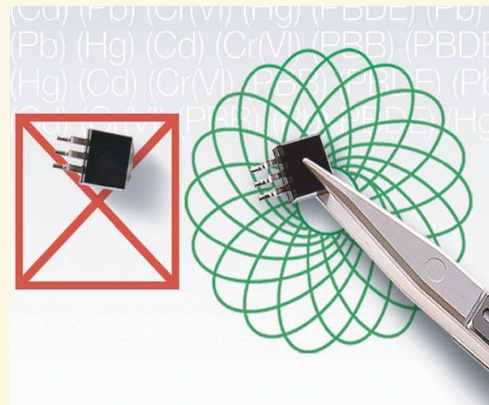

Pressure differentials in a sealed enclosure result from heat generated by electrical and electronic components in the enclosure, and the fluctuation of the outside temperature. In the case of negative pressure or vacuum, dust and humidity can be absorbed through the door seal. The **DA 284 series** pressure compensation plug provides an IP 66 degree of protection. A semi-permeable membrane inside the plug allows air and humidity to leave the enclosure, while only allowing dry air into the enclosure, not humidity and dust. For best results mount two devices, one diametrically opposite the other on enclosure surfaces. The plug protrudes 0.79" (20mm) from enclosure surface and mounts in a 1.57" (40mm) diameter hole. **Sold in packs of 1.**

PLUG DIMENSIONS: 2.36" (60mm) Diameter x 1.46" (37mm)H

Mfg. Part No.	Description	Material	Stock No.	Price Each
● 28400.0-01	Pressure Compensation Device	ABS Plastic	02M0114	16.64
● 28401.0-00	Pressure Compensation Device	316L Stainless Steel	82K8836	170.27

NON-METALLIC ENCLOSURES

MNX SERIES POLYCARBONATE ENCLOSURES

- Meets NEMA enclosure Types 4, 4X, 6, 12, 13 requirements
- Metric size knockouts
- Tough, UL listed polycarbonate molded construction
- Gray opaque or smoked transparent cover
- Protection: IP 67 (IEC 529)
- UL94-V2 flame resistance

MNX series polycarbonate enclosures have been designed to house and protect electrical and electronic components in hostile environments. These enclosures utilize injection of the enclosure gasket material during the body molding process. This new process provides precision molding of the gasket, allowing superior enclosure protection ratings. Temperature range: -40°C to +120°C; in continuous use: max. 80°C. Enclosures include: enclosure cover with cover screws, wing heads for cover screws, and base with mounting plate screws and gasket. Order **mfg. part no. MIVxxx** mounting plates and **mfg. part no. FP22046** mounting foot kit separately below. Smooth-sided or ABS versions are available, as well as, front panel accessories; go online or call Newark.

NON-METALLIC ENCLOSURES

MNX SERIES LOW-PROFILE POLYCARBONATE ENCLOSURES

- Meets NEMA Enclosure Types 1, 4, 4X requirements
- Weatherproof fit
- Smooth-sided, low-profile design
- Impact resistant polycarbonate
- Gray opaque or smoked transparent cover

New polycarbonate enclosures designed for housing and protecting electrical and electronic components in harsh environments. Solid opaque or smoked transparent covers. Enclosures are NEMA rated and offer a protection rating of IP66/67, IP66, and IK08. Come complete with enclosure cover and base, cover screws and wing heads, mounting plate screws and gasket. **Order mfg. part no. MIVxxx mounting plates separately below.** Enclosures are also available in ABS and UL rated materials; [go online](#) or call Newark.

ABS PICCOLO

FIBOX®

- Gray or Transparent Cover Option
- Also Available in UL/CSA Approved Polycarbonate Plastic

Piccolo enclosures are designed for electronic devices and terminal blocks, but they are also ideal for many other small size housing applications. Provide protection to IP67 that keeps out dust, damp and water. Also available in pushbuttons; [go online](#) or call. NEMA 1, 4X, 6, 12, 13.

EK SERIES MODULAR POLYCARBONATE ENCLOSURE SYSTEM

FIBOX®

- Enclosures Are Easily Combined
- Knockout Flange Openings
- Meets NEMA Enclosure Types 4, 4x, 6 and 12
- Smooth-sided Available in PC or ABS Plastic
- Gray or Transparent Cover
- Extension Frames Available for More Depth

Impact-resistant, medium size polycarbonate enclosures with a high protection rating (IP 67). Separate enclosures and small distribution panels (2-4 enclosures) can be assembled directly to the wall with screws or with wall-fastening lugs. Knockout flange openings: **Size 1** = 1.3 x 4.7"; **Size 2** = 2.5 x 7.7"; **Size 3** = 3.9 x 12.1". Gland plate kits include a gasketed plain plate that can be easily punched or milled for entry fittings, then mounted to knockout opening.

EURONORD ENCLOSURES

FIBOX®

Just Added

Euronord range is designed to house DIN-rail mounted terminal block and various types of sensors. Includes base with screws for mounting plate/DIN-rail, cover with PUR gasket and stainless steel cover screws. Euronord enclosures are also available in ABS, polyester and aluminium. There are more than 160 different off-the-shelf versions available. Color: light gray.

NON-METALLIC ENCLOSURES • THERMAL MANAGEMENT PRODUCTS • CABINETS & RACKS

CAB SERIES

FIBOX®

- Corrosion Resistant
- Impact Resistant
- Gray or Transparent Cover Option
- NEMA 1, 4, 4X, 12, 13: IP 66/67
- Material: Polycarbonate
- Padlockable
- Also available in UL/cUL approved polycarbonate plastic
- Also available with 3mm double bit lock/key instead of latches

CAB series wall mounting cabinets are designed especially for instrument builders offering a new easy way of mounting components at several different depths. A rigid internal door (swing door) can be mounted or hinged at different depths, with the mounting plate in the bottom or bus bars mounted. The FIBOX® quick lock system allows easy access to the enclosure while still insuring tight sealing.

INSPECTION WINDOW KITS

FIBOX®

- Add Inspection Window to Any Enclosure
- Maintain Enclosure Environmental Ratings up to NEMA 4
- Temperature Range: -40°F to +248°F (-40°C to +120°C)
- Resistant to UV Radiation, Non-Hygroscopic
- Chemical Resistance to Concentrated Mineral Acids, Organic Acids, Oxidants, Deducing Agents, Neutral/Acid Salt Solutions, Grease, and Oil
- NEMA 4, 12; IP54 or IP65

Inspection windows permit viewing and access to readouts and controls that are surface mounted on plastic or metal enclosures.

ENCLOSURE VENTILATOR

FIBOX®

The new enclosure ventilator features a molded-in-place gasket that ensures a tight seal and eliminates the loose, separate gasket required in older models. This device is used in pairs on opposing exterior sides to permit passive cross flow ventilation. Can be used with any enclosure both metallic and nonmetallic. Suitable for outdoor use. Can be subject to UV light and water exposure. Dimensions: 50 x 70 x 20mmH. Includes hardware, drilling templates and mounting instructions. Easy installation. Can be used with any 40 x 40mm fan with maximum height of 15mm. Order fan separately on pages 1467-1469

EUROCARD (DIN, VME, Sbus) 19" SUBRACKS

VECTOR ELECTRONICS & TECHNOLOGY, INC.

- Aluminum Construction
- Designed in Accordance with DIN 41612 Specifications
- Front Extrusion Holes Positioned at 5.08mm Increments (1HP)
- 84HP DIN Adapter Strips Allows for Direct Mounting of DIN Connectors
- Designed for a Maximum of 21 Slots
- CG1 Series Card Guides Ordered Separately on page 2197

Assembled subracks or subrack kits can be custom configured to your specifications. Accessories available are DIN connectors, front panels, rack handles and decorative outer enclosures. For standard card depths of 160, 220, 280, 340 or 400MM. Kits are easy to assemble with hardware included. Other card guides, prototyping boards and extender cards sold separately; go online or call.

FRONT PANEL KITS, NON-EMC FOR DIN SUBRACKS

Front Panel Kit with Fixed Handle

Ejector Handle

Screw-mounted, DIN-based front panel kits include V classic pull-only fixed handle or I VME64 VME64 ejector handle. Both include removable handle identification panels, aluminum front panel, and all mounting hardware including PCB board mounting support bracket hardware. Aluminum front panel have brushed grain finish and clear conductive iridite plating to match standard finish for Vector packaging products. Fits mfg. part no. CCA-160, -220, -280, -340, -400 (mm) standard DIN 19" subracks in sizes 3U and 6U.

CG3 SERIES CARD GUIDES AND ACCESSORIES FOR 1101.10 EMC SUBRACKS

CG3 series card guides are constructed of flame-resistant, UL94V-0 (UL file #E41613) plastic and available in Standard RAL 7032 gray or RED. CG3-80 series includes mounting screws for attachment to CCA or CCK 26 through 32 EMC-type subracks with the addition of rear horizontal rails. Order CG3-80E/12 for EMC clips installed. Guides easily snap-in to 1101.10 EMC subracks (cPCI, VME64X) and are available with optional ESD grounding clips. Card guide keys prevents plug-in assemblies from being inserted into the wrong slot by inserting into the chambers for the CG3 card guide, and mfg. part no. 90100016 injector/ejector (Type IV) handles; order separately on page 315. Blue air block plates block airflow in unpopulated subrack slots.

19" VECTORPAK SUBRACKS, EIA RS-310

Designed in accordance with EIA standard RS-310, Vector subracks offer maximum versatility within a 19" rackmount format. All racks are adjustable in both height and depth offering standard product solutions for standard and custom requirements.

All subrack sizes are compatible with Vector prototyping boards on pages 2197-2198 and will accommodate other sizes as well. Several card guide types are available: "C" = Continuous guide plate; "M" = Aluminum screw-in guides; "P" = Nylon screw-in; "S" = Nylon snap-in. "F" type does not include guides and must be purchased separately, on page 2198. Snap-in guides are adjustable horizontally in .250" increments. Screw-in guides have variable horizontal positioning.

CCK SERIES KITTED CARD RACKS

VectorPak CCK series unassembled racks are flat-packed and include all Vector "T"-Struts, side plates and assembly hardware. "F" type racks are sold as frame only, all others include 21 pair of snap-in or screw-in card guides. Mfg. part no. CCK13S-HT/90 has no rackmount brackets.

CARD MOUNT RACKS AND CARD
MOUNT MODULES PER EIA
RS-310

- Aluminum Racks Designed for Mfg. Part No. CM45A65 Card Mount Module
- 16 Pairs of Nylon, Snap-In Card Guides Installed at 1" (25.4) Increments
- Guide Positions Variable at 0.25" (6.35) Increments
- Card Mount Panel Thickness: 0.063" (1.60)
- Removable Front Panel

Vector Cardmount racks and modules for applications requiring front panel components, increased rigidity or varying card thicknesses. Rack handles included. Easy insertion and removal and secured with 10/32 jack screws. (Included with cardmount modules). Order card mount racks and modules separately.

CMA SERIES MODULE SUBRACKS

CMA series module card subracks for 4.5" H (114.30mm) cards are factory assembled and designed for mounting EFP series modules ordered separately on page 2199. Fixed pairs of aluminum module mounting guides installed for 1.6", 2.0" and 3.0" wide modules. EFP series modules firmly attach to rack with SC10-3A captive jack screws.

CABINETS & RACKS • BACKPLANES

EFP SERIES CARD MODULES

For packaging circuit boards and insertion into Vector **CMA series** module subracks (racks ordered separately). Securely mounts onto rack front rail with 10-32 jackscrew on front panel. Brushed aluminum finish. Easy to assemble kits use grooved frame-lock rails for card slots to support one or more 0.063" thick (1.6mm) boards. Card stops are provided for securing boards of varying lengths. Mounting hardware and instructions included.

MULTI-MOD™ INSTRUMENT CASE

W30-66-46B Closed

W30-66-46B Open

Ideal for small case packaging of testers, controllers and other instruments. Brushed aluminum construction provides excellent RF attenuation and an attractive finished appearance. Kits include: frame, top and bottom covers and hardware. Extruded two-piece frame assemblies quickly with self-tapping screws. Standard 0.062" cards slide into grooves in Frame-Loc Rails.

VMEbus 3U AND 6U J1 AND J2 BACKPLANES

21-Slot Monolithic 6U J1/J2 Combination Backplane

21-Slot 3U J1 Backplane

VMEbus 6U monolithic J1/J2 combination backplanes feature 8-layer laminate FR-4 board construction, no pins for I/O to J2 and no capacitors. Choice of configurations: locking power connectors, power bugs or a combination of both connector types. Connectors are press-fit DIN 41612 Class II constructed of thermoplastic polyester and rated UL94V-0. **Mfg. part no. VMEBP21J1** 21-slot VMEbus 3U J1 backplane features 8-layer laminate FR-4 board construction and controlled impedance design to reduce crosstalk and ringing on bus lines. Massive copper-clad power and ground planes on opposite board side; patented shielding technique effectively surrounds each signal trace with a closed conductive loop for blocking both capacitive and inductive coupling. **Mfg. part no. VMEBP21J2** 21-slot VMEbus 3U J2 backplane features 4-layer laminate FR-4 board construction and DIN connectors row B bussed for 32-bit expansion; A and C rows can be used for local extension buses, such as VMX or VSB, or can be assigned according to user I/O requirements. Other slot sizes available; call Newark for details.

(78042)

STD-BUS BACKPLANES

Features:

- Faraday shield lines reduce crosstalk
- Wiring pads on board to connect RESET switch for front panel controls
- High reliability connectors with gold/plated contacts and 10-position power connector uses Wago power blocks
- Plugboard series: 4610 series

4610-16-1A

STD backplanes are fully assembled and tested. 8- or 16-slot versions available, connector spacing is on 0.75" centers. Both have ample positions for decoupling capacitors. Meets all STD Bus specifications, including interrupt priority lines.

TELESCOPING SLIDES

THINGS TO CONSIDER WHEN ORDERING SOLID BEARING SLIDES

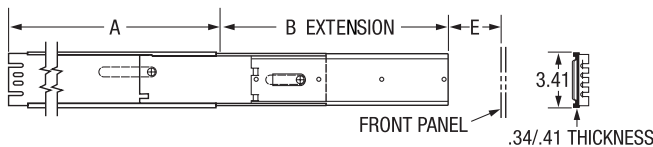

- Dimension A is The Slide Length In Closed Position, B is The Length of Extension From The Front of The Cabinet, E is The Minimum Required Setback from Front of Cabinet
- Overall Extended Length of Slide is A + B - E
- Standard 19" Cabinets Have 17.75" W Opening, Pair of 0.38" Slides and 17" W Chassis Will Fit 17.75" Cabinet Opening

OTHER CRITERIA TO CONSIDER WHEN ORDERING SLIDES

- Load Capacity
- Cycle Life Usage (Low, Moderate, High)
- Extension (Full or ¾)
- Mounting Depth
- Environment (Harsh or Controlled)

C-230 SERIES SOLID BEARING SLIDES

C-230-S Side and End View

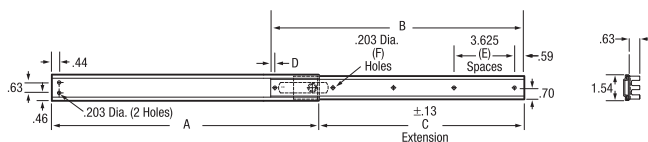

Made of cold rolled steel, these 3-section, fully extendable slides fit standard rack or enclosure and provide high resistance to shock and vibration. They are well-suited for mobile applications. A quick disconnect stop latch permits instantaneous removal of the chassis. Slides are coated with Poxylube® dry film lubricant for smooth sliding action. To select overall slide length, determine cabinet mounting depth; see *How-to-Order* information on this page. **Sold in sets of 2.** Up-and-down pivoting slides are also available; go online or call.

(7073)

C-874 SERIES TWO-SECTION SPACE- SAVING SLIDE, NON-PIVOTING

Ideal for commercial/military applications. Completely interchangeable and a minimum of deflection when slides are in the extended position. Poxylube® dry film lubricant for smooth sliding action. Designed to lock in an extended position and automatic release is available if lock-out is not desirable. **Sold in sets of 2.**

(77844)

C-300 SERIES SOLID BEARING SLIDES

C-300-S Side and End View

C-300-D Side and End View

The C-300 series is ideal for commercial/military applications. It offers complete interchangeability and a minimum of deflection when slides are in the extended position. All slides are supplied with a quick disconnect feature which permits the entire chassis to be removed easily and replaced. A coating of Poxylube® dry film lubricant provides smooth sliding action. The C-300-D series pivots up or down and locks in position with positive detent action. **Order mfg. part no. B-308 bracket kit on page 2203 to mount in cabinets deeper than slide length.** To select overall length of slide, determine cabinet mounting depth. **Sold in sets of 2.**

TELESCOPING SLIDES

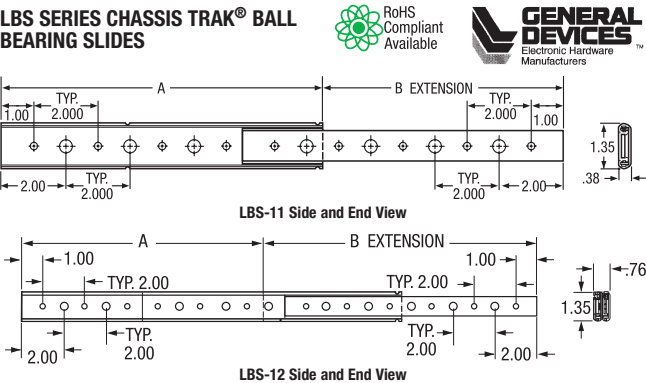

CTS SERIES NONPIVOT SLIDES

Full-extension slides fit any standard rack or enclosure. Automatic lockout and pushbutton lock release for easy chassis removal. CTS and CTRS series slides are rated at 175 lbs. CTHS and CTHRS series slides are rated at 275 lbs. Contains 1 pair of slides and all mounting hardware. Order mfg. part no. B-307-1 or 2 bracket kit separately on page 2203, to mount CTS and CTRS series in cabinets deeper than the slide length. Order mfg. part no. B-810-1 bracket kit separately on page 2203, to mount CTHS and CTHRS series in cabinets deeper than slide length. CTRS series slides are identical to CTS series slides but with stainless steel ball-bearing rollers. To select overall length of slide, determine cabinet mounting depth. See How-to-Order information on page 2201. Sold in pairs of 2.

NON-METALLIC ENCLOSURES

GRIP-TECH HAND HELD ENCLOSURES

How to order:

1. Pick enclosure **Series** and **Size**. All cases include: assembly screws and sealing kit
2. Pick side grips for case (side grips sold separately and in sets of 2, on page 2209)
3. Pick battery holders (battery holders sold separately, below). Battery clips included

Features:

- Polycarbonate material
- UL94 V0 rated
- NEMA 4 sealing
- Brass assembly inserts
- Stainless steel assembly screws
- Screw on battery door
- Changeable side grips

Extreme durability, maximum protection and custom enclosure appearance. Four new ergonomic designs and side grips in 7 colors. Accepts standard LCD modules.

EXTRUDED ALUMINUM ENCLOSURES

- 6 colors available
- Highest quality anodizing
- NEMA 4 sealing, optional
- Wall mounting kits, optional
- Custom lengths available
- Custom colors available

Ordering Notes:

All enclosures include: 1 extruded case, 2 end plates and assembly screws. Mounting flanges sold separately. NEMA 4 gasket kits sold separately.

High EMI/RFI protection. Durable finish provides extreme protection and great look and feel. Order accessories and hardware separately; go online or call
